Experience

2018-01 - 2018-04

Ruby on Rails Developer
CareGuide

- Implemented full stack features to move phone conversations on platform behind the paywall to increase subscriptions, and ultimately increase revenue using **Ruby on Rails**, **HTML**, **CSS**, **JavaScript** (**jQuery** & **ReactJS**)
- Redesigned and implemented Facebook Shares feature to increase the peak of shares per day by 256% and the peak of daily organic visits from shares by 197%
- Wrote several **SQL** queries to analyze data, as well as reflect on quantitative impact of releases
- Wrote clean, clear and thoroughly **unit-tested** code
- Followed the **Agile** methodology with daily stand-ups and product weekly meetings

2017-05 - 2017-08

Software Developer
Finastra

- Built a fin-tech solution's wireframe for BMO using **HTML**, **JavaScript** and **CSS**
- Revamped an obsolete find-tech product for migration of RBC's high net worth clients, using **Java** on the back-end and **JSP** pages on the front-end
- Reflected and iterated on findings with Sprint Reviews

2016-09 - 2016-12

Software Architect
Marsh Canada Limited

- Took lead on proxy server for authentication purposes of an in-house application, using **Java** servlets and **JSP** pages
- Took lead on periodically updating and ensuring the success of daily health check tests

2016-01 - 2016-04

Technology Analyst
Scotiabank

- Led the department's move to **JIRA** (online **Agile** project control tool) through various presentations
- Provided guidance in department's adoption of **Agile Framework**
- Used **Microsoft Excel** to create various charts, graphs and reports

Side Projects
